

TSURUMI PUMP

Positive Effect of Advanced KTZ KTZE – Automatic Pump with **Electrode**

1.5 / 2.2 / 3.7kW

Automatic Operation with Electrode

The electrode-type sensor ON/OFF operation prevents dry running, reduces power consumption (50% over standard type – Tsurumi comparison), and extends operational life.

Energy Conservation

Cost Saving

Noise Reduction

Multi-Directional Hose Coupling

The hose coupling has been devised so that it can be, without any extra parts, converted to an inclined discharge direction.

Every KTZ-series pump (1.5 to 11kW) is equipped with the above hose coupling as standard.

* The additional features do NOT affect on the pump performance.
